

**Bilaga till motionen angående avkriminalisering av narkotika för eget bruk
Till Enhets årsmöte 2018-03-10**

Kofi Annan

”Avkriminalisera bruket av narkotika och påbörja arbetet för att skapa lagliga och reglerade drogmarknader – det kräver FN:s tidigare generalsekreterare Kofi Annan i ett öppet brev som publiceras i samband med FN:s toppmöte om narkotika.”

“We need to regulate drugs because they are risky. Drugs are infinitely more dangerous when produced and sold by criminals who do not worry about any safety measures. Legal regulation protects health. Consumers need to be aware of what they are taking and have clear information on health risks and how to minimize them.”

FN & WHO

“The United Nations and World Health Organisation have issued a call for drugs to be decriminalised.”

Buried in a joint release on ending healthcare discrimination, the organisations called for the “reviewing and repealing punitive laws that have been proven to have negative health outcomes” by member states. Among a number of measures, this included “drug use or possession of drugs for personal use”.

Norge

Stortinget i Norge har tagit beslut om att inte längre straffbelägga narkotikanvändare. Istället ska människor med missbruk få behandling.

Sverige

Norge vill avkriminalisera narkotikabruk. Men här i Sverige sätter regeringen ner foten. Istället vill socialminister Annika Strandhäll ha en bred politik med "hårdare tag".
